# Year in Review: Great Projects and Great Partners

This past year we have expanded our reach in more ways than one! 2021 took us beyond the continental U.S. to international wind projects. We also built our first 107.5 meter wind turbines and are now bidding 120 meter turbines. Along with these adventures, our industrial and general construction teams were proud to be part of the growth in the Western

United States. We got to participate in new airport terminals, hospitals, stadiums, highway bridges, and maintenance events. Each new challenge brought growth and opportunities. We are proud to support local companies that have been partners from the start and thank our network of loyal customers that have invited us to partner on these new adventures. We look forward to all that 2022 has to offer!

# Highlights From 2021

## A GREAT TEAM MAKES ALL THE DIFFERENCE

Behind all the impressive equipment are the operators, riggers, drivers, project managers, dispatchers, engineers and yard hands that make it work. Despite being a crane company, we are in the business of great people.

We were thrilled to host a few of our business partners from Liebherr.

Many company events and social gatherings allowed us to show our appreciation to our team
