A DEWALT DRILL!

COMMITTED TO SAFETY!

We are proud to welcome Brandon Johnstun to our Mountain Family! Working as our Field Safety Manager, Brandon comes to us with 20 years of commercial construction experience and 11 of those years specifically working in safety.

Brandon says his favorite part of the job is being in the field interacting with everyone. He says, "Creating a safety culture and building upon the great things already in place will be my main focus here at Mountain Crane. I'm thrilled to be a part of this great company!"

Valued Relationships

So much of the construction industry is based upon relationships. J&M Steel is just one of our valued partners we have worked with on countless steel jobs and have enjoyed success together through the completion of these awesome projects. Thank you to all our customers and business partners who make coming to work each day a pleasure!

Steel Solutions and
Okland Construction

IT'S MOVING DAY

Our crew and 275 ton crane took part in a unique project recently. This 2500 sqft home was constructed, including all the finish work, inside a factory. It was then delivered to it's lot in Payson, Utah. With great precision our team hoisted each of the three sections of the home (approximately 40k lbs each) and placed it on the foundation. After seaming the walls together it will be move in ready!

“ MOUNTAIN HEAVY TRANSPORT

WE LOVE WIND! Our team has been in Kansas doing all kinds of wind work. Pictured here our heavy haul guys utilized our 12 line self propelled Goldhofer modular transporter to move cranes and wind components. The loads ranged from 120,000 to 650,000 lbs!

MOUNTAIN

STRONG

The core of Mountain is a top notch crew who is committed to SAFETY and executing every job with professionalism and precision. We are proud to be Mountain strong.

MAY CONTEST:
