Applications due 09/10/19

Questions: [media@mountaincrane.com](mailto:media@mountaincrane.com)

Two winners will receive a \$1,000 or \$500 cash award

*Good Luck!*

# TOWER CRANE TEAM

SALT LAKE INTERNATIONAL AIRPORT

Pictured:  
Tower Cranes: SKPeiner 575-32  
All Terrain 500 ton  
TMS 800 E

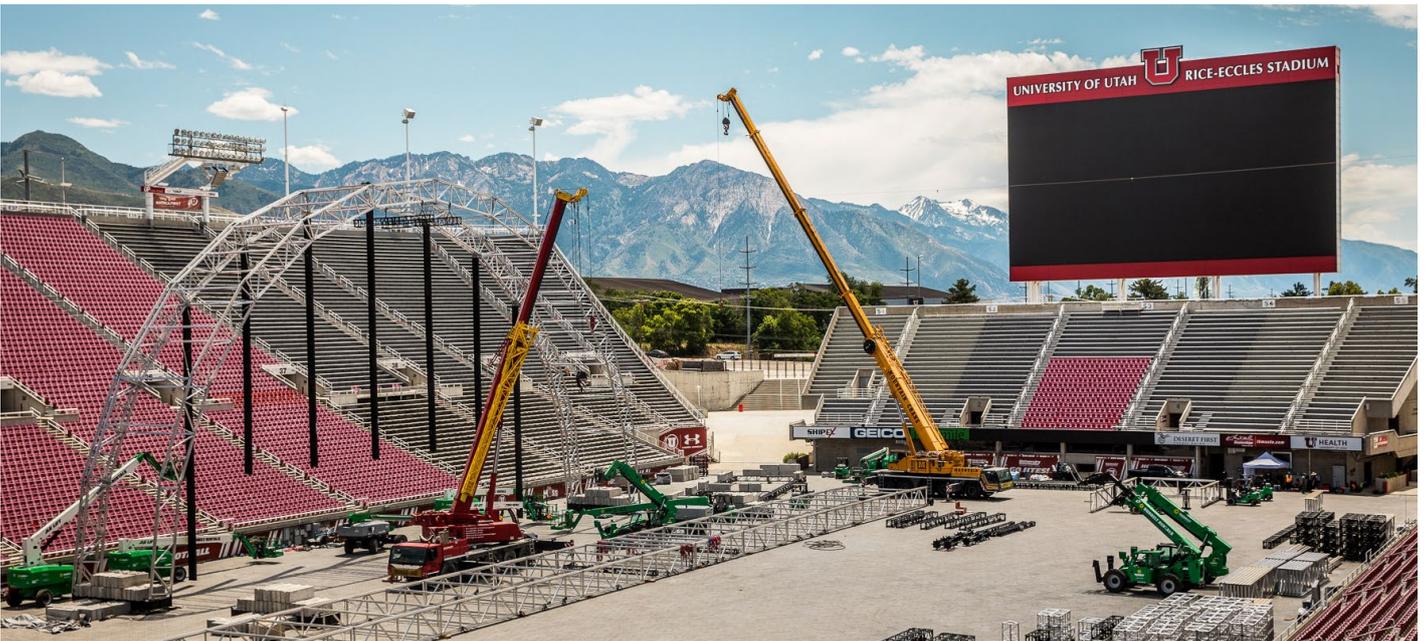

A tower crane is a common fixture at most large scale construction sites. They are pretty hard to miss as they rise hundreds of feet in the air. These cranes hoist large amounts of steel and other materials needed throughout the entire building process. But, none of that would be possible without the crew that assembles and dis-assembles these massive cranes. Our team did the job of erecting and taking down all 3 of the tower cranes used at the Salt Lake International Redevelopment project. This team is safety minded and awesome at what they do. From the operator on the ground to the guys 200 feet up, they get the job done!

## MID FIELD AND CENTER STAGE

We had to opportunity recently to assist in the building of a massive stage inside the University of Utah football stadium. Our LTM 1130 and our LTM 1160 worked night and day to have the stage ready for the 2019 Young Living Convention. We were back on the scene a week later to bring it all down.

## A HISTORY OF EXCELLENCE IN REFINERY WORK

Refinery lifts and transportation bring unique circumstances. These jobs often involve tight spaces, complex engineering and strict time frames. We at Mountain Crane, have worked in various refineries all over the Western U.S. We love the challenges and opportunities that come with working in this type of environment.

# MOUNTAIN

# STRONG

The core of Mountain is a top notch crew who is committed to SAFETY and executing every job with professionalism and precision. We are proud to be Mountain strong.
