# The Tower at the Temple

After closing in 2019 for major renovation, work continues on the historic Salt Lake City temple for the Church of Jesus Christ of Latter-Day Saints. Built by early pioneer settlers in the 1800s, the temple is undergoing several upgrades, including a significant seismic update. Our team has been on site for multiple phases of this four-year project. This past month our tower crews assembled the tower crane that will sit on the North side of the construction site. Our 500 ton crane hoisted all sections of the Peiner SK575 from the ground up. Located in the heart of the city, this tower crane was assembled safety and quickly with minimal lane closures.

# Making Preparations for the Big Lift

## SETTING THE STATUE

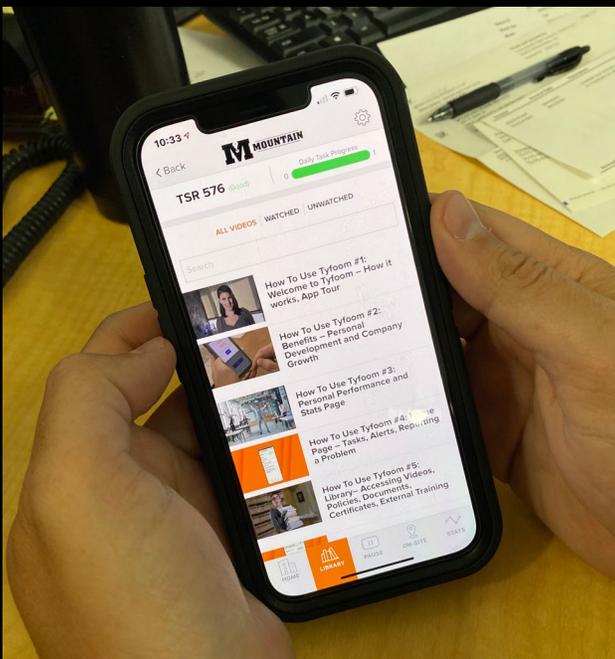

Mountain currently has ongoing projects at 5 additional temples in the U.S. Pictured below, our crews carefully set the “Angel Moroni” Statue atop the Saratoga Springs Temple. Absolute precision was needed as our 275 ton held the statue and our 300 ton held the man basket within just a few feet of each other.

# Ingenuity With a Touch of Creativity

This project involved the install of a heat exchanger in very tight quarters at a recent refinery turnaround. Our jack and slide team and crane team came together to execute this project safely and efficiently.

# Safety Strong

With safety at the forefront of all we do, Mountain recently joined forces with Typhoon to provide daily safety trainings delivered right into the hands of our team members every day. Each video includes tips, reminders and trainings to ensure every member of our team is engaged in safety.

# M MOUNTAIN

The core of Mountain is a top notch crew who is committed to SAFETY and executing every job with professionalism and precision. We are proud to be Mountain strong.
