April 2016

## Setting a 60,000 Pound Drum

Recently our crane and heavy haul teams worked together to transport and set a massive 60,000 lb. drum into Great Salt Lake Minerals.

The preliminary work involved several weeks of engineering, permitting, widening a road, and planning for safely working around overhead power lines. The on-site work included our Osh Kosh M1070 Tugger and six lines of Goldhofer modular platform trailer pulling the drum into the facility. With a width of 22' and height of 29' our 550t crane was needed along the route to hoist the drum over a pipe rack running right through its path. After setting the drum back on the Goldhofer, the transport team changed from a pulling configuration to a pushing configuration which allowed the steerable trailer to set the vessel on the cement pad adjacent to the crane. The drum was then offloaded by our 550 ton crane and set safely in place. Congratulations to our engineering team, Mountain Heavy Transport, and our crane crew for a job well done!

### Inside this Issue:

- Lifting a 190,000 lb Compressor
- Helping Build Hale Center Theatre
- Mountain Heavy Minute
- Mountain Crane Photo Contest

WIN A \$250 VISA  
GIFT CARD!

# PHOTO CONTEST

Last month Mountain Crane started a 60 day photo contest, encouraging customers (and employees!) to send in pictures of our cranes on your projects. There will be 3 winners chosen who will each win a \$250 VISA gift card. The winners will be announced in the May newsletter. We invite as many as are interested to participate and look forward to your entries! The contest is open until April 30, so submit your best work!

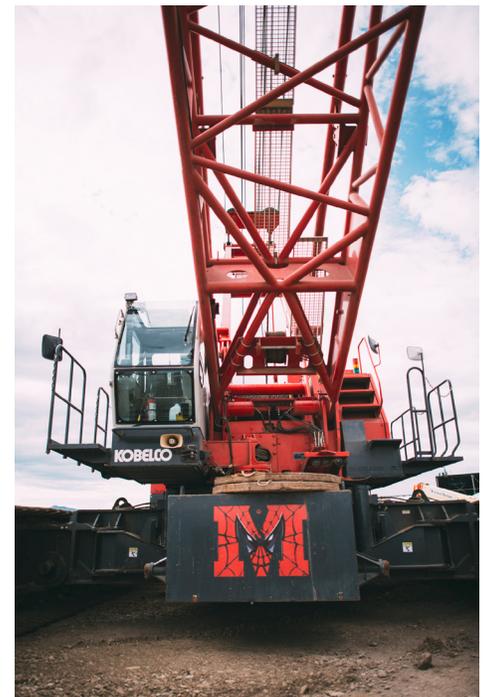

## Guidelines:

- Include any job specifics you may have
- Both current and previous jobs will be considered
- You are welcome to submit multiple entries (no limit!)
- Submit photos to [info@mountaincrane.com](mailto:info@mountaincrane.com)
- By submitting photos, you agree to let Mountain Crane use these images in future marketing materials.

WE'VE ALREADY RECEIVED!!!**

# MHT Minute

Remember “Stretch Armstrong” from when you were a kid?

**We have the trailer equivalent of it at MHT!**

Our new Faymonville Telemax trailer extends from a legal step-deck trailer to a 172’ trailer built for excessively long and awkward loads. The steerable trailer is perfect for wind blades, girders, and long vessels. If you’ve got a ridiculously long load, MHT has a solution!

Mountain Crane Service provides a variety of services across the Intermountain West including plant shutdowns, steel, pre-cast panels, heating and cooling units, transformers, pools and hot tubs, demolition, windturbines, and bridge girders, to name a few.

Heavy Haul service is also available.

Mountain Crane Service employees receive continual training through Operating Engineers Local 3 and have their CCO Certification.

Check out our website at [www.MountainCrane.com](http://www.MountainCrane.com) for more information.

## Utah's Largest Crane Fleet

load charts for each of our cranes are available online at
