Jack -N- Slide at St. Mark's Hospital

What do you do when you have a 9,000 lb. transformer that needs to be installed inside of a hospital? You hire our Jack -N- Slide crew to bring it safely right down the halls!

Along with Cache Valley Electric, we have been on site at St. Marks Hospital this past month updating their electrical system. Several switch gear controls have been replaced, an old 13,000 lb. transformer was taken out, two V16 diesel generators were installed and, pictured here, you see the new 9,000 lb. transformer as it was brought in with our Hydraslide system right down the hallway of the hospital. It was an extremely tight squeeze at times, but with the right equipment, will power, and a fair amount of muscle, the crew pulled it off flawlessly!

Inside this Issue:

-Jack 'N Slide at St. Mark's Hospital
 - Drum Roll Please!

-MAY ENTER TO WIN:

AN
RTIC
 COOLER!

MHT MINUTE

DRUM ROLL PLEASE!!!

MHT recently assisted with a large drum move. The transport involved a vessel that is over 29’ high and 26’ wide....talk about a wide load! Our Goldhofer modular platform trailer was perfect for the job as it allowed us to adjust the load throughout the entire move. We were able to steer the trailer independently from the truck and also adjust the platform over asphalt, gravel, and varied elevations. Additionally, an operator was placed at the back of the trailer to monitor all movements and keep the trailer level along the way.

Once inside the facility, there was a pipe rack that was just over 20 feet wide. Due to the height of the drum on top of the trailer, it would not fit underneath the pipe rack. When the trailer reached this point, we used the Grove GMK 7550 crane to lift the drum over the pipe rack, drive the truck under, and then place the drum back on the trailer. The job was executed flawlessly!

A big shout out to our Goldhofer team and our project planner for making this a smooth move.

MAY GIVEAWAY

This month's enter to win drawing is for an RTIC 45 Cooler. RTIC Coolers is a leading direct to consumer retailer of premium rotomolded coolers & stainless steel tumblers. This mid size cooler makes a perfect multi purpose cooler. It can be carried by one person and keeps your food fresh and drinks ice cold!

ENTER TO WIN HERE!

36 cans

45 quarts

40 pounds of ice

11.25 gallons

Mountain Crane Service provides a variety of crane services across the Intermountain West including plant shutdowns, steel, pre-cast panels, heating and cooling units, transformers, pools and hot tubs, demolition, windturbines, and bridge girders, to name a few.

Mountain Heavy Transport provides all heavy transport services including heavy haul, jack -n- slide, and platform trailers (Goldhofers).

Mountain Crane Service employees receive continual training through Operating Engineers Local 3 and have their CCO Certification.

Check out our website at www.MountainCrane.com for more information.

Utah's Largest Crane Fleet

load charts for each of our cranes are available online at
