## Transporting a Flight Simulator

This month Mountain Crane had the unique privilege of transporting a flight simulator for Bountiful Flight. This job featured our crane service along with Mountain Heavy Transport, and our Jack and Slide Division. We used our jack and slide skates to move the simulator out of a tight area in an enclosed hanger in the West Jordan Airport, to a spot where our 40 ton boom truck could safely hoist. As soon as it was in the air, we used our heavy haul truck to back up underneath the simulator. After securing the simulator on the trailer, we were ready to move the simulator to its new home in Bountiful, Utah.

Of course it was easier said than done. The challenging part about the whole job was the fragile gyros located within the flight simulators computer. If anything was to go wrong with those gyros it would ruin the whole machine, which is worth \$100,000. We took extra precautions transporting the simulator by choosing routes with smooth roadways, avoiding pot holes along the way while maintaining a mild speed. When we arrived to the delivery site, we set up the 40 ton boom truck right next to the semi and lifted the simulator off gently. We then swung around and set the simulator on jack and slide skates in front of the new hanger. Since this new hanger only had 20 feet of clearance our jack and slide skate were perfect for this part of the job. We gently pushed the simulator into place and lifted the simulator off the skates using jacks and very gently sat it upon the ground. We thank Bountiful Flight for the amazing privilege it was to do this job for them!

# LIFTING THE ANGEL MORONI

On Wednesday, June 1, Mountain Crane had the opportunity to help remove the lighting rod and attach a hook to the lightning-damaged Angel Moroni statue atop the Bountiful Utah Temple. Mountain Crane used the GMK 5275 crane to hoist Angel Moroni, and the GMK 6300 crane hoisting a man basket. Both cranes had to reach up 200 + feet to replace the 500 lbs statue.

## MHT MINUTE

Summer is upon us! Along with the longer days and the warmer temperatures comes a lot of construction work. Stay safe in the road construction zones and be aware of the oversize loads. MHT takes pride in transporting heavy equipment safely and efficiently. Keep on truckin!

# JUNE GIVEAWAY

We're giving away a family four-pack to Lagoon!

Twist, turn and fly on one of 50 rides. Feel your heart race on X-Venture attractions. Slip and slide through whitewater waves at Lagoon A Beach. Take a trip back through the Wild West in Pioneer Village. Sing along with the best shows in town.

**ENTER TO WIN!**

Mountain Crane Service provides a variety of crane services across the Intermountain West including plant shutdowns, steel, pre-cast panels, heating and cooling units, transformers, pools and hot tubs, demolition, windturbines, and bridge girders, to name a few.

Mountain Heavy Transport provides all heavy transport services including heavy haul, jack -n- slide, and platform trailers (Goldhofers).

Mountain Crane Service employees receive continual training through Operating Engineers Local 3 and have their CCO Certification.

Check out our website at [www.MountainCrane.com](http://www.MountainCrane.com) for more information.

***Utah's Largest Crane Fleet***
