August 2015

### Placing an LEF Tower

Mountain Crane recently had the opportunity to place the new LEF tower in the refinery in beautiful Sinclair, Wyoming. Mountain Crane utilized the new Liebherr 1750t crane, lifting the 96,000 lb tower. The tower was 120 feet tall and had a 117 ft radius, with a tip height of 110 ft.

Mountain Crane also had the chance to use our 100 ton dollies to transport the tower to the 1750t inside the plant. At Mountain Crane, we love being able to turnkey projects like this. Using our heavy haul services, we were able to haul the tower to our cranes and place them, successfully executing the job from start to finish.

# Congratulations to our 2015 Safety Shield Scholarship Winners!

Mountain Crane was overwhelmed with the number of scholarship entries we received this year. There were plenty of wonderful applicants, and determining this year’s winners was extremely difficult. We would like to congratulate the recipients of our 2015 Safety Shield Scholarship Award! Trenton and Karsyn are both excellent students, working hard to further their education.

Mountain Crane wishes them the best of luck as they pursue their academic goals with the aid of this scholarship.

**Karsyn Bingham**  
Southern Utah University  
\$1,000 Scholarship

“Mistakes do happen and we can learn from them, but I have also seen injuries resulting out of carelessness. Many of these accidents and injuries can be prevented by taking the right precautionary steps to make it safer.. I’m extremely glad for safety and the precautions people take”

**Trenton Chavez**  
Southern Utah University  
\$500 Scholarship

“I value safety for a number of reasons, it keeps me safe and it keeps others safe. I am in charge of my own safety in that moment as well as the safety of everybody on the road. When I get in my car I need to exercise safety precautions in order to drive in a safe manner. I realize that my safety does not only depend on me, other drivers also need to take responsibility. The only way I can increase my safety is by being a defensive and cautious driver, always keeping in mind that other people may not be safe and may be endangering the rest of the drivers on the road.”

## MHT MINUTE

MHT looks forward to receiving our new Faymonville 16-Line Dual-lane Platform trailer, the latest in dual lane transport technology, this specialized equipment along with a perimeter frame and suspension beam system will allow MHT to tackle some of the most challenging transportation jobs in the industry. “Innovation, imagination and drive along with consistency are the basic fundamentals of success”

Come join MHT in Houston at the Break Bulk convention Booth #1041

For a safe and efficient move of anything over-dimensional or over-weight, please give us a call at: 801-556-3828.
