September 2013

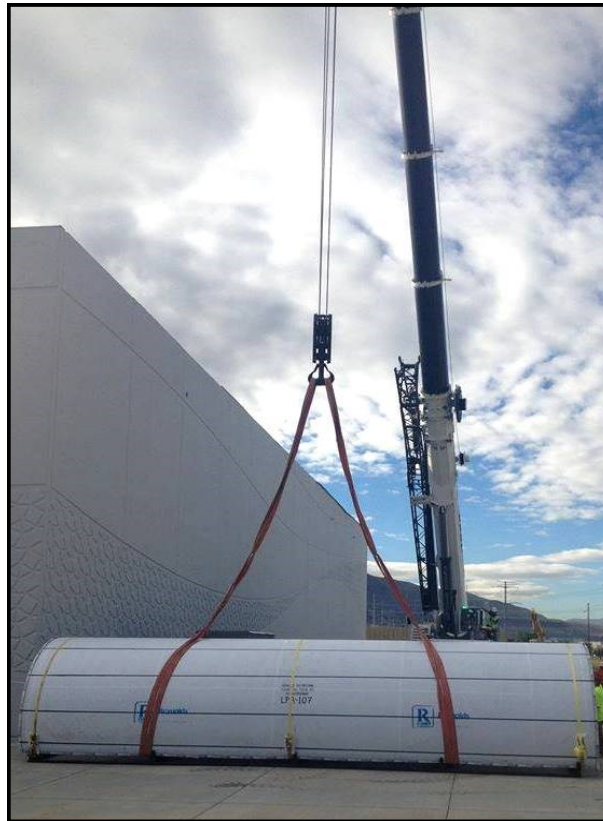

Shark Tunnel Project

Mountain Crane Service has been working with several contractors to help build the new Living Planet Aquarium in Draper, Utah. One of the new exciting features of this aquarium will be a shark tank where visitors will be able to walk under and watch these creatures swim above them. Mountain Crane's Grove GMK 5275 All Terrain Crane installed this 40 ft. long, 26,000 lbs. 6.5 inch thick acrylic tunnel into place.

THE LIVING PLANET
AQUARIUM

This lift required intense precision as there was about a 1-inch clearance on both sides as they lifted the tunnel from the ground and into its proper position through the open ceiling into the aquarium. Our talented crane operator, Riley Allen, executed this lift flawlessly. Check out the following video clip from KUTV for more information about this project.

Top Trainer Nomination

Josh Martin, our Operations Team Lead, was nominated for Top Trainer in *Crane & Rigging Hot Line's* Annual Training Excellence Award Program. This prestigious nomination is for those who have had a positive impact on their industry through innovative safety training or hands-on instruction.

Safety Shield Scholarship Winners

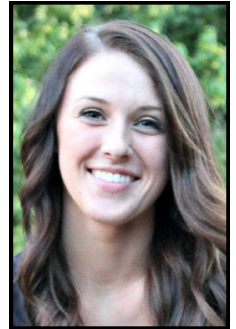

Mountain Crane would like to congratulate the recipients of our 2013 Safety Shield Scholarship Award! These two had fantastic academic standing and wrote phenomenal essays about safety. Morgan and Jess were recognized and given their scholarship awards at a Mountain Crane Banquet held at the end of September. Mountain Crane wishes them the best of luck as they pursue their academic goals with the aid of this scholarship.

All scholarship applicants were required to write an essay about “Why safety matters and is important to you and your family”. Featured below are inserts from both Morgan and Jess’s essays about safety.

Morgan Ward—\$1000 Award

“To me, safety is a state of mind - a way of life that ultimately brings my family home safe each night. I believe safety is an important skill to apply in all aspects of our lives; from protective gloves while doing yard work to safe driving, no one precaution is more important than another.”

“Safety can be applied everywhere. Once we understand this, we can begin to learn and apply it to our lives. I am so grateful for safety programs, companies who promote safety, those around me that apply safety in their lives, allowing my family and I to be protected every day.”

Jess Middaugh—\$500 Award

“I am the wife of a Project Engineer whose duties include walking around job sites on a daily basis. If safety was not number one with his company then I would have to worry everyday for his safety. I would have to worry that he might not come home because of a preventable accident and my kids would be without a dad. This makes me a definite advocate for occupational safety on the job.”

“I am grateful for all the safety guidelines that are put into place to ensure the safety of my loved ones, and others.”

Mountain Crane Team Training

The Mountain Crane Team was able to participate in an awesome training and fun-filled weekend up in Park City. The training began with an afternoon at the Olympic Park where employees & spouses were able to choose from a myriad of activities: a zip-line to drop tower, rope courses, or a 60-second summer bobsled ride. The team was joined by Olympian Noelle Pikus Pace (competing in Women’s Skeleton in the 2014 Winter Games) who gave a presentation about safety and the Mountain Crane Law following a group dinner.

The next morning our team participated in a seminar run by Corporate Alliance that focused on team building activities and the importance of quality relationships in the workplace. The event ended with an opportunity for everyone to see the “UT6 Artifact” (a sculpture made from remnants of the World Trade Centers after 9/11 that will become a part of a permanent memorial in Salt Lake later this fall) as it toured across Utah. The Mountain Crane team is composed of so many talented, hardworking, and all around outstanding individuals and our company is happy to be able to have events like these to show how much we appreciate our employees. As you can see from the pictures, the event was a blast!

Mountain Crane Service provides a variety of services across the Intermountain West including plant shutdowns, steel, pre-cast panels, heating and cooling units, transformers, pools and hot tubs, demolition, windmills, and bridge girders, to name a few.

Heavy Haul service is also available.

Mountain Crane Service employees receive continual training through Operating Engineers Local 3 and have their CCO Certification.

Check out our website at www.mountaincrane.com for more information.

Utah's Largest Crane Fleet

Load charts for each of our cranes are available online at www.mountaincrane.com/fleet.

Employee Spotlight

Shelly Payne is the newest member of Mountain Crane's Accounting Department. She has been with the company for over two months. Shelly had previously worked in different areas in the construction industry for the last 13 years and when the opportunity to work for Mountain Crane appeared she went for it! Her favorite thing about Mountain Crane so far is the way the employees are treated and the amazing people she gets to work with.

Shelly is originally from Riverton, UT. She currently lives with her pet dog and is the proud aunt of two adorable nephews that she loves to spoil rotten as well. In her spare time she likes to run, read, cook, hang out with friends, laugh, and listen to a wide array of music. An interesting thing about Shelly is that although she loves to cook, she doesn't love to eat whatever she has made. By the time it is finished she is over it which results in lots of treats being brought into the office or being taken to neighbors.

Giveaway: BYU Football Tickets

Mountain Crane is excited to give away a pack of 4 football tickets to a BYU Football Game! Come cheer on the Cougars from a "fan"tastic seat!
