Wind Maintenance

Mountain Crane Service has been actively involved in the construction and maintenance of wind turbines since the purchase of its first Manitowoc 16000 in 2008. We now have a group of cranes especially suited to this line of work, as well as skilled crews of operators & riggers. These crews are well-versed in the project management, scheduling, and remote jobsite conditions that accompany wind maintenance. They are resilient to adverse weather conditions and perform their tasks safely and efficiently.

For more information on the equipment available to service your next wind farm construction or maintenance project, contact us at estimating@mountaincrane.com. We are willing and able to perform work nationwide.

Inside this Issue:

- Wind Maintenance
- Annual Refresher Safety Training
- New 2012 Liebherr LTM 1400-7.1
- Employee Spotlight
- Giveaway: 4-Pack of Jazz Suite Tickets

Annual Refresher Safety Training

Mountain Crane Service employees went through several consecutive sessions of safety training over the holiday break. Mountain Crane management likes to take advantage of the down time during these winter months to renew certifications and gear up for a new year. Safety is a high priority at Mountain Crane and we had over 90% attendance despite conflicts with holiday plans.

Employees are now certified for 2013 through the Wyoming/Montana Safety Council, Utah Safety Council, and MSHA. We had several excellent instructors visit Mountain Crane Service facilities over the course of this training. If you would like additional information regarding these instructors feel free to contact Gary Rehmer at gary@mountaincrane.com.

New 2012 Liebherr LTM 1400-7.1

Mountain Crane Service is excited to announce the arrival of its second Liebherr LTM 1400-7.1. The first, easily recognizable with its red paint and Optimus Prime Transformer decals, quickly became a flagship of the Mountain Crane Service fleet after its purchase in 2010.

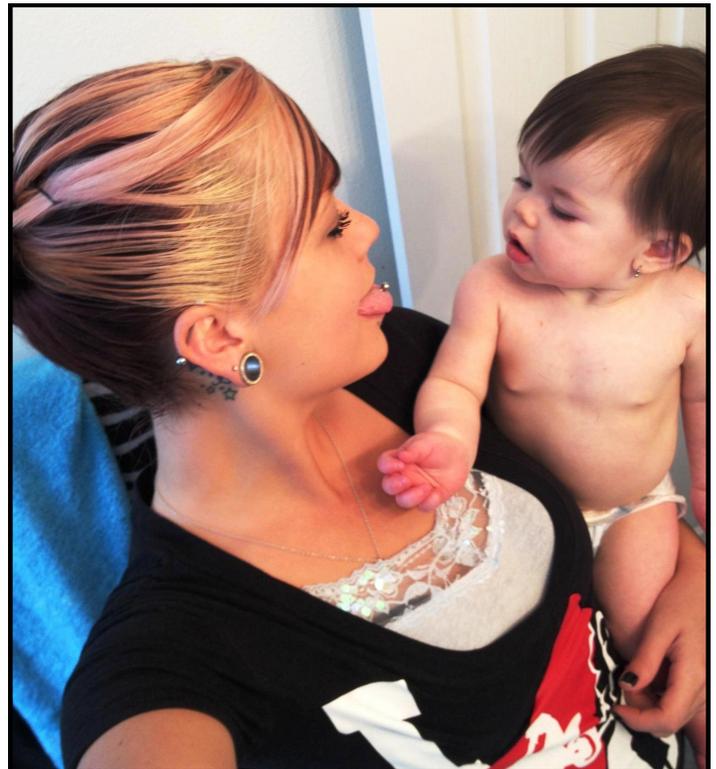

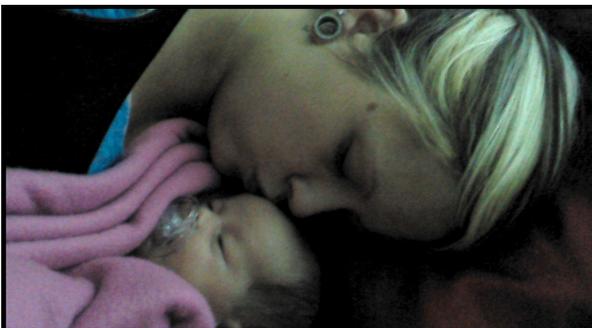

The second machine is equipped with the same attachments as the first, including fixed jib, luffer, and super lift. Load charts for this crane can be found on our website at <http://mountaincrane.com/fleet.html>.

Employee Spotlight

Kara Ripley has been the **Permit Manager** with the company for 2 and 1/2 years and has been a hard-working and valuable part of the Mountain Crane team. Her favorite thing about Mountain Crane is that no day is ever the same and it constantly challenges her abilities and knowledge.

Kara is originally from West Valley City, Utah. She has a very cute 9-month old daughter named Emery Reillynn. In her spare time Kara enjoys snowboarding, riding 4 wheelers, playing with her daughter, going "jeeping", hiking, and watching Motor Cross. She also loves the color pink and her pit bull.

Mountain Crane Service provides a variety of services across the Intermountain West including plant shutdowns, steel, pre-cast panels, heating and cooling units, transformers, pools and hot tubs, demolition, windmills, and bridge girders, to name a few.

Heavy Haul service is also available.

Mountain Crane Service employees receive continual training through Operating Engineers Local 3 and have their CCO Certification.

Check out our website at www.mountaincrane.com for more information.

Utah's Largest Crane Fleet

Load charts for each of our cranes are available online at www.mountaincrane.com/fleet.

Giveaway: 4-Pack of Jazz Suite Tickets
