## Tuning Up Turbines

+ **02**

### Scenic Setting

Our team enjoyed the gorgeous backdrop of Snow Basin Resort as they set a 60,000 lb transformer recently. Using our LTM 1400 the transformer was set safely and successfully.

## Wind Maintenance Experts

All hands on deck to get the job done! Pictured is our team of experienced wind maintenance crews assisting with blade exchanges in West Texas. This site had several unique owner and customer requirements, but with the use of our LTM

1750 and AC500 working in tandem with the support of our Faymonville 4-stage blade trailers, smaller truck cranes and rough terrain cranes, we were able to bring solutions to the job. Our project managers and engineers laid out a step-by-step plan and our operations team took it from there. We have the tools and team necessary to complete any job.

# Lifting Professionals

Making Each Lift With Precision and Safety

## THE MOUNTAIN SERVICE TEAM

From track rebuilds to all crane repairs, we've got you covered.

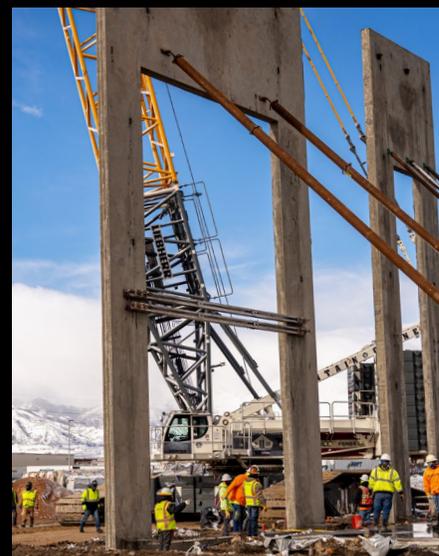

Our full-service mechanics provide inspections, routine service, and major repairs. We offer build up and disassembly for cranes of all sizes. Our field mechanics are available to come to your location anywhere in the U.S.

## Setting Massive Panels

Working with Stout Builders and Frontline Concrete, our team recently set 141 concrete panels with our LR1600. Each of the massive 55 ft. tall panels averaged 220,000 lbs.

## Safety Strong, Safety Share

We should never underestimate the importance of completing a Job Hazard Analysis and Tool Box Talk before each every job. It is in this forum that everyone can ask questions and get a clear understanding of expectations and requirements prior to beginning work. This meeting is often quick but should not be rushed to ensure that everyone has a clear understanding of the job and more importantly any hazards with each assigned task.

Terrell Davis, Field Safety Supervisor

The core of Mountain is a top notch crew who is committed to SAFETY and executing every job with professionalism and precision. We are proud to be Mountain strong.
