Cokeville, Woming Bridge Placement

A Crane for Any Job

Hoisting massive bridges, raising concrete walls and hanging steel are just a few of the projects our team provides in general construction jobs. There is always a buzz in the air on crane day with many onlookers at the job site and passers by.

Long before any lift takes place each job goes through the critical steps of lift planning and ensuring all safety precautions are in place. With extensive experience, our team is the secret weapon on any project. We are proud of our fleet and our professional team to get each and every project done on time, prepared and safety strong!

Hanging Steel High School Remodel

CHILDHOOD CANCER AWARENESS MONTH

“The Big Dig”
Our team was thrilled to be involved in this great event.

Getting Perspective!

Seeing how small our team looks up against the gigantic LR 11000 and the adjacent wind turbine allows you to catch a glimpse of the enormity of this crane and a turbine blade! Day in and day out these guys execute these massive tasks easily. We are proud of this hard working and professional crew!

Safety Strong, Safety Share

"Being complacent can cause accidents and injuries. It can take as little as a minute to double check everything to ensure safe operations. The best part about Mountain Crane is if you're unsure about something, it's easy to reach out and find the right answer from any of our experienced and knowledgeable operators."

Shane Wozniak, Crane Operator

M MOUNTAIN

The core of Mountain is a top notch crew who is committed to SAFETY and executing every job with professionalism and precision. We are proud to be Mountain strong.
