## Showing Off the Red, White and Blue

The Mountain team has participated in a large project in New Mexico since December 2021. It has involved multiple cranes from 70 Ton hydraulics up to 900 Ton crawlers. As the project has evolved, our engineering team has been up to the task! Along with providing detailed lift planning, we have been involved in much of the project planning and have an onsite supervisor to ensure everything goes smoothly!

30' x 60' American Flag Flying in New Mexico

900 TON

We recently had an opportunity to fly an 1,800 square foot American flag from the hook for Presidents Day! The crawler crane is visible from miles away and has even attracted the attention from a local Instagram account: @onlycranes22

# A VERSATILE FLEET

300 TON

80 TON

Many projects require a wide variety of crane needs. Our New Mexico project is no different. We have been able to offer large and small solutions to each stage of the project.

500 TON

## FLYING CARS???

If you've been waiting for the day to see flying cars, the future is now! You'll just need a 80 ton crane to help get the job done! Our crew recently assisted in the unveiling of the brand new model of the Ultra Exclusive, Range Rover Sport, Deer Valley Edition. The cars needed to be hoisted on the roof of a building in Park City, Utah for the unveiling event. Our team gave the cars the white glove treatment and safely placed the them in position for our customer.

## Safety Strong, Safety Share

"Protect yourself while driving in the snow. Check all road conditions before travel. Thoroughly inspect tires, clear off mirrors, windows, lights and reflectors. Give yourself plenty of time, keep a safe following distance & slow down!"

Bryce Olsen, Field Safety Manager

The core of Mountain is a top notch crew who is committed to SAFETY and executing every job with professionalism and precision. We are proud to be Mountain strong.
