LTM 1250 Model Crane

## Rail Dumper Assembly

Beginning in late 2022, our industrial team began work on an ore dumping project at a mine in Idaho. Recently, we brought in two Liebherr 1350 (400 ton) cranes to execute a 260,000 lb barrel assembly lift. Our operators and crew performed the two crane pick flawlessly. The rail dumper will take fully loaded rail cars, turn them on their side, and empty the ore for processing.

The new plant is expected to be operational in 2024.

## The Big Dig Childhood Cancer Awareness

We were privileged to participate once more in the “Big Dig” Event!

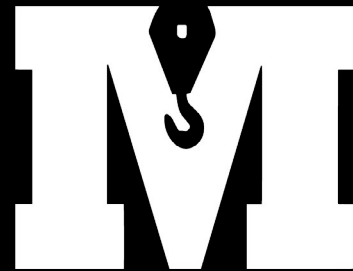

Collaborating with J&M Construction and various other vendors, we provided children battling cancer with an opportunity to experience the world of construction and enjoy some well-deserved fun!

## Helicopter Pad

It's not exactly a common request, but should the need arise for a helicopter pad to be installed on a residence, our General Construction team can do the job! Recently, our 115 ton all terrain crane set several concrete pads on the top level of a residence to provide a safe landing pad for a helicopter.

## Safety Strong, Safety Share

"In the event of heavy rainfall at your job site, always remember to evaluate the conditions and hazards that could arise from moisture.

While driving, it is important to increase your following distance and be aware of standing water on the roadways."

Bryce Olsen, Field Safety Manager

The core of Mountain is a top notch crew who is committed to SAFETY and executing every job with professionalism and precision. We are proud to be Mountain strong.
